PROJECTS / OPEN-SOURCE

NGO AID ALLOCATION | [LINK](#)

Unsupervised Learning

- Designed a data-driven solution to allocate \$10M in aid by analyzing socio-economic and health data.
- Implemented K-Means Clustering to group countries based on development indicators.
- Performed data cleaning, exploratory analysis, and visualizations to interpret clusters and suggest actionable insights.
- Tools used: Python, Scikit-Learn, Pandas, Matplotlib, and Seaborn.

BIG MART SALES

Machine Learning

- Performed Exploratory Data Analysis (EDA) to identify trends, patterns, and anomalies.
- Applied statistical techniques to understand feature importance and relationships.
- Developed Supervised Machine Learning models like Linear Regression, Decision Trees, and XGBoost to predict sales with high accuracy.
- Handled missing data, outliers, and optimized features for better model performance.

CERTIFICATIONS

- Introduction to Python - Internshala.
- SQL - HackerRank.
- Data Visualisation using Tableau - Great Learning.
- HTML - Great Learning.
- CSS - Great Learning.
